Journal of Sports Sciences, 1985, **3**, 272–273

Subject index

Accelerometers, running style, stride rate, stride length, biomechanics, joint forces, 41
Aiming, pistol, shooting, pentathlon, 93
Anaerobic interval training, muscle strength, maximal anaerobic power, economy, rat quadriceps muscle, 139
Anaerobic power, cycle ergometer, maximal pedalling, optimal load, 181
Anthropometry, body composition, somatotype, distance running, women, 115
Anxiety, depth-estimation, divers, experience, underwater, 27
Arousal, reversal theory, inverted-U-hypothesis, stress, 169
Augmented feedback, conventional training, motor control learning, rowing, biofeedback, 3
Biofeedback, augmented feedback, conventional training, motor control learning, rowing, 3
Biomechanics, joint forces, accelerometers, running style, stride rate, stride length, 41
Body composition, somatotype, distance running, women, anthropometry, 115
Body composition, training, skinfolds, physique, swimming, 33
Computer simulation, materials testing, midsoles, sports surfaces, shock absorbency, mathematical modelling, 103
Conventional training, motor control learning, rowing, biofeedback, augmented feedback, 3
Cycle ergometer, maximal pedalling, optimal load, anaerobic power, 181
Depth-estimation, divers, experience, underwater, anxiety, 27
Distance running, women, anthropometry, body composition, somatotype, 115
Divers, experience, underwater, anxiety, depth-estimation, 27
Economy, rat quadriceps muscle, anaerobic interval training, muscle strength, maximal anaerobic power, 139
Exercise ventilation, ventilatory control, neural, humoral, hyperpnoea, 51
Experience, underwater, anxiety, depth-estimation, divers, 27
Humoral, hyperpnoea, exercise ventilation, ventilatory control, neural, 51
Hyperpnoea, exercise ventilation, ventilatory control, neural, humoral, 51
Inverted-U-hypothesis, stress, arousal, reversal theory, 169
Joint forces, accelerometers, running style, stride rate, stride length, biomechanics, 41
Lactate threshold, ventilatory threshold, prior exercise, 189
Materials testing, midsoles, sports surfaces, shock absorbency, mathematical modelling, computer simulation, 103
Mathematical modelling, computer simulation, materials testing, midsoles, sports surfaces, shock absorbency, 103
Maximal anaerobic power, economy, rat quadriceps muscle, anaerobic interval training, muscle strength, 139
Maximal pedalling, optimal load, anaerobic power, cycle ergometer, 181
Mental practice, mental preparation, meta-analysis, psych-up, strength, 67
Mental preparation, meta-analysis, psych-up, strength, mental practice, 67

Subject index

Accelerometers, running style, stride rate, stride length, biomechanics, joint forces, 41
Aiming, pistol, shooting, pentathlon, 93
Anaerobic interval training, muscle strength, maximal anaerobic power, economy, rat quadriceps muscle, 139
Anaerobic power, cycle ergometer, maximal pedalling, optimal load, 181
Anthropometry, body composition, somatotype, distance running, women, 115
Anxiety, depth-estimation, divers, experience, underwater, 27
Arousal, reversal theory, inverted-U-hypothesis, stress, 169
Augmented feedback, conventional training, motor control learning, rowing, biofeedback, 3
Biofeedback, augmented feedback, conventional training, motor control learning, rowing, 3
Biomechanics, joint forces, accelerometers, running style, stride rate, stride length, 41
Body composition, somatotype, distance running, women, anthropometry, 115
Body composition, training, skinfolds, physique, swimming, 33
Computer simulation, materials testing, midsoles, sports surfaces, shock absorbency, mathematical modelling, 103
Conventional training, motor control learning, rowing, biofeedback, augmented feedback, 3
Cycle ergometer, maximal pedalling, optimal load, anaerobic power, 181
Depth-estimation, divers, experience, underwater, anxiety, 27
Distance running, women, anthropometry, body composition, somatotype, 115
Divers, experience, underwater, anxiety, depth-estimation, 27
Economy, rat quadriceps muscle, anaerobic interval training, muscle strength, maximal anaerobic power, 139
Exercise ventilation, ventilatory control, neural, humoral, hyperpnoea, 51
Experience, underwater, anxiety, depth-estimation, divers, 27
Humoral, hyperpnoea, exercise ventilation, ventilatory control, neural, 51
Hyperpnoea, exercise ventilation, ventilatory control, neural, humoral, 51
Inverted-U-hypothesis, stress, arousal, reversal theory, 169
Joint forces, accelerometers, running style, stride rate, stride length, biomechanics, 41
Lactate threshold, ventilatory threshold, prior exercise, 189
Materials testing, midsoles, sports surfaces, shock absorbency, mathematical modelling, computer simulation, 103
Mathematical modelling, computer simulation, materials testing, midsoles, sports surfaces, shock absorbency, 103
Maximal anaerobic power, economy, rat quadriceps muscle, anaerobic interval training, muscle strength, 139
Maximal pedalling, optimal load, anaerobic power, cycle ergometer, 181
Mental practice, mental preparation, meta-analysis, psych-up, strength, 67
Mental preparation, meta-analysis, psych-up, strength, mental practice, 67

Meta-analysis, psych-up, strength, mental practice, mental preparation, 67
Midsoles, sports surfaces, shock absorbency, mathematical modelling, computer simulation, materials testing, 103
Modelling, video-feedback, tennis service, 127
Motion analysis, velocity analysis, 197
Motor control learning, rowing, biofeedback, augmented feedback, conventional training, 3
Muscle strength, maximal anaerobic power, economy, rat quadriceps muscle, anaerobic interval training, 139
Neural, humoral, hyperpnoea, exercise ventilation, ventilatory control, 51
Optimal load, anaerobic power, cycle ergometer, maximal pedalling, 181
Physique, swimming, body composition, training, skinfolds, 33
Pistol, shooting, pentathlon, aiming, 93
Prior exercise, lactate threshold, ventilatory threshold, 189
Psych-up, strength, mental practice, mental preparation, meta-analysis, 67
Rat quadriceps muscle, anaerobic interval training, muscle strength, maximal anaerobic power, economy, 139
Reversal theory, inverted-U-hypothesis, stress, arousal, 169
Rowing, biofeedback, augmented feedback, conventional training, motor control learning, 3
Running style, stride rate, stride length, biomechanics, joint forces, accelerometers, 41
Shock absorbency, mathematical modelling, computer simulation, materials testing, midsoles, sports surfaces, 103
Shooting, pentathlon, aiming, pistol, 93
Skinfolds, physique, swimming, body composition, training, 33
Somatotype, distance running, women, anthropometry, body composition, 115
Sports surfaces, shock absorbency, mathematical modelling, computer simulation, materials testing, midsoles, 103
Strength, mental practice, mental preparation, meta-analysis, psych-up, 67
Stress, arousal, reversal theory, inverted-U-hypothesis, 169
Stride length, biomechanics, joint forces, accelerometers, running style, stride rate, 41
Stride rate, stride length, biomechanics, joint forces, accelerometers, running style, 41
Swimming, body composition, training, skinfolds, physique, 33
Tennis service, modelling, video-feedback, 127
Training, skinfolds, physique, swimming, body composition, 33
Underwater, anxiety, depth-estimation, divers, experience, 27
Velocity analysis, motion analysis, 197
Ventilatory control, neural, humoral, hyperpnoea, exercise ventilation, 51
Ventilatory threshold, prior exercise, lactate threshold, 189
Video-feedback, tennis service, modelling, 127
Women, anthropometry, body composition, somatotype, distance running, 115
